I urge you to reject petition 04-160. As a over the road truck driver, traffic and weather available to me for a certain market area, is very important in planning my trip. I can't always get traffic on the local stations when I need it. I pay for my XM service and should be able to get any programing available. Satelite television is able to offer programs that you can receive for free on local channels, radio should be the same. If you don't want to pay for the service and use free local channels, so be it. Those of us willing to pay for a service, should not be restricted by those who don't want to pay.
